

POWER
device charger

Recharging the Power Bank...

The device is charged by using the USB-to-mini-USB cord (*included*).

With the mini-USB adapter piece inserted into your cord.....plug the end into the 5V Input on your device.

Insert the regular USB end into your power source (computer, 12V USB adapter, etc) to charge your Power Bank.

The light on the device will illuminate a **red** color. The light will **turn off** when the Power Bank has reached a **full charge**. *(The estimate time of a full charge cycle is approx. 6 hours.)*

You now have saved power ready to charge your other favorite devices!

Connect your devices to the 5V Output using the necessary cord for your cell phone, games, etc.

Charging your devices...

Connect your device to the **Power Bank** (using the appropriate cord) into the USB input on the **Power Bank**. * *the cord included is compatible with some but not all devices.*

Press the large square button to START the charge cycle. The light will illuminate **blue**.

Stop the charge by pressing the button again. The light will turn off when the Power Bank no longer outputting a charge or has been depleted.

blue = Power Bank is outputting a charge

red = Power Bank is being recharged
